

Docket 02-227, Broadcast Ownership Rules

I must add my voice to those who strongly disagree with your proposal to allow any further consolidation in the ownership of broadcast and other media outlets. Your interest and duty should be with the general public, not with the large corporations looking to make another buck.

You admit that the changes made to the radio industry have had very bad, detrimental results, and yet you choose to ignore the lesson and seem to be determined to legislate in the corporate interest rather than in the interest of the public you serve.

Please reconsider your position on this matter and do not relax the current restrictions on market share ownership.

Sincerely,

Mark S. Sattler
